

Monitor the effectiveness of all your special programs – and improve the performance of all your students

Manage all programs for all students online

- RtI
- Special education
- Positive behavior support
- Section 504
- ELL
- Other district defined programs

Data is at the heart of improving student performance. Without easily accessible data identifying students in need of help and monitoring their progress can be a monumental and time consuming process. The Enrich™ online progress monitoring and performance management solution makes your student data accessible and gives you the tools to use it efficiently and effectively to improve student performance.

Enrich – The right solution for every educator, and every student

At the district

Enrich enables district level educators to see an overview of district performance with summary and analysis data. But what sets Enrich apart is the ability to drill down and view data by program, school, class, teacher, or even individual student. With this feature everyone in the district – from district-level administrators to classroom teachers – has the opportunity to have an impact on student success.

At the school

Enrich enables school administrators to monitor school performance and manage district expectations. Just by logging into Enrich, principals can easily identify:

- Struggling students
- Interventions deployed
- Intervention tiers
- Educator responsible for interventions
- Progress
- Effectiveness of interventions

In the classroom

Enrich enables teachers to confidently implement beneficial strategies to get positive results for their students. Within Enrich teachers will find appropriate interventions, reasonable goals, logical progress monitoring devices, and instructions on how to implement the prescribed strategy. Everything within Enrich is aligned with your district and school's specific programs and goals. Load Enrich with your district's preferred:

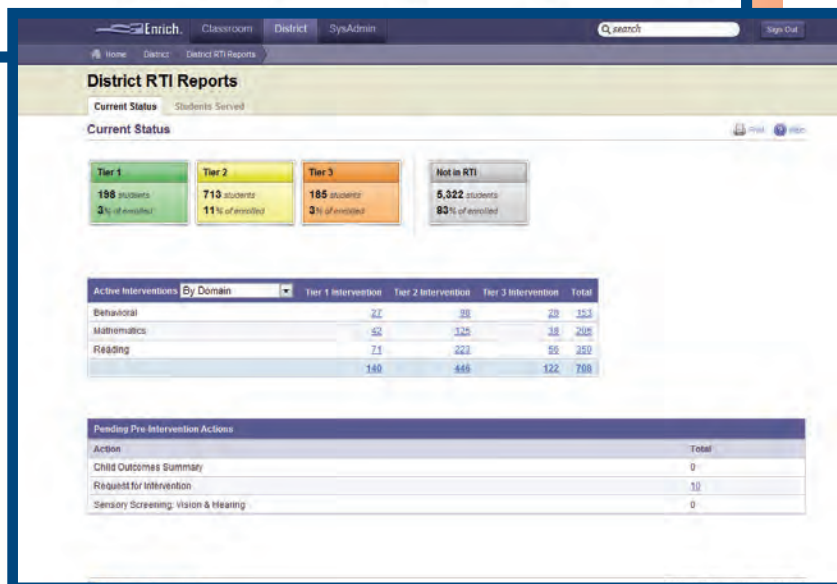

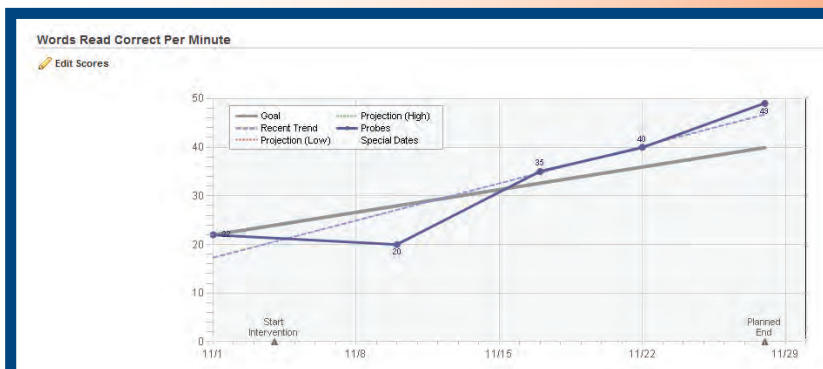

- Instructional supports
- Interventions
- Strategies
- Goals
- Assessment
- Fidelity reviews

Simplify data management with a simple online solution

Replace the piles of papers and 3-ring binders you're currently using to monitor student performance

Graphical representations of data make it easy to access, analyze and share.

View performance data for any program at the district, school, classroom, and student levels.

Move your RtI and other academic and behavioral programs online and:

- Monitor district, school, classroom, and student performance more easily with comprehensive access to data.
- Support teachers more effectively with district prescribed instructional knowledge and standards.
- Improve student outcomes more efficiently with proven interventions and streamlined progress tracking.

“Global Education Technologies has been a valuable partner to the SC Special Education program for more than 15 years. We’re excited to implement GET’s newest solution, Enrich™, that combines Special Education Case Management, State Reporting, and Response to Intervention management. Enrich will be a huge benefit to educators as they provide differentiated instruction to all students.”

- MARLENE METTS, STATE DIRECTOR
OF EXCEPTIONAL CHILDREN,
SOUTH CAROLINA
DEPARTMENT OF EDUCATION

Supporting educators, Enriching students' lives

GET is dedicated to providing support for educators as they work to meet the individual needs of their students. As part of our commitment to the education industry and students' success, GET is proud to sponsor the Magic Wand Foundation, a revolutionary youth empowerment program. Learn more about how your students can benefit at www.MagicWandFoundation.com.
