

Assess Online

A joint project between the HCS Technology Development and the HCS Assessment Department, Assess Online provides a distribution center for HCS testing data to teachers, administrators, and district personnel. Assess Online provides reports on MAP, PACT, HSAP, SAT, EOC, and EXPLORE. It also continues to grow, almost every day, providing access to even more testing data and to more users. Assess Online is Horry County Schools online solution to put valuable testing data into the hands of those that need it the most.

- Gives access to teachers and school administrators to a wide variety of testing data including MAP, PACT, HSAP, SAT, EOC, and EXPLORE.
- Connects to our student management system to generate reports based on class rosters.
- Also provides access to district administrators to a series of district level reports. It also provides access to other district personnel who can utilize assessment data for their data drive decisions.
- Provides an ever expanding way for HCS Assessment to distribute its data to those who need it the most.
- Houses many reports providing valuable data and insight into instruction.
- Allows schools to alternately group students to produce test data reporting for various un-traditional classroom settings and rosters.
