

## HORRY COUNTY SCHOOLS TECHNOLOGY DEVELOPMENT

# G&T

The G&T application provides useful reporting on the district's G&T students.. Aside from reporting, the application also allows tracking of Duke Tips and Jr. Scholar's. This tracking and reporting is used by the district to ensure that our gifted students are receiving the quality of education that they need.

In addition, the G&T application connects to the HCS datawarehouse to draw upon student information, student testing history, and other required information. A great demonstration of the kinds of data reporting that HCS Technology can provide, the G&T application fills the district's G&T reporting needs.
